WEB SERVER

(TIF330805)

SEMESTER 3

Acara 6

(Middleware, Auth Sederhana, dan Struktur Folder Lengkap)

Nama:

Achmad Fatkur Rizki

NIM:

E41250750

PROGRAM STUDI DILUAR KAMPUS UTAMA (PSDKU)

TEKNIK INFORMATIKA KAB. NGANJUK

JURUSAN TEKNOLOGI INFORMASI

POLITEKNIK NEGERI JEMBER

TAHUN 2026

- **Studi Kasus**

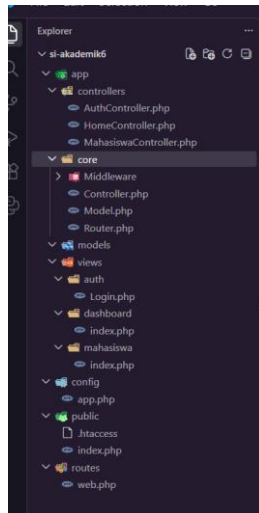

Halaman dashboard, form tambah mahasiswa, dan halaman edit hanya boleh diakses user yang sudah login. Tanpa proteksi, siapa pun yang tahu URL bisa masuk. Middleware Auth mengecek session sebelum Controller dijalankan. Jika belum login, user diarahkan ke halaman login.

- **Tujuan**

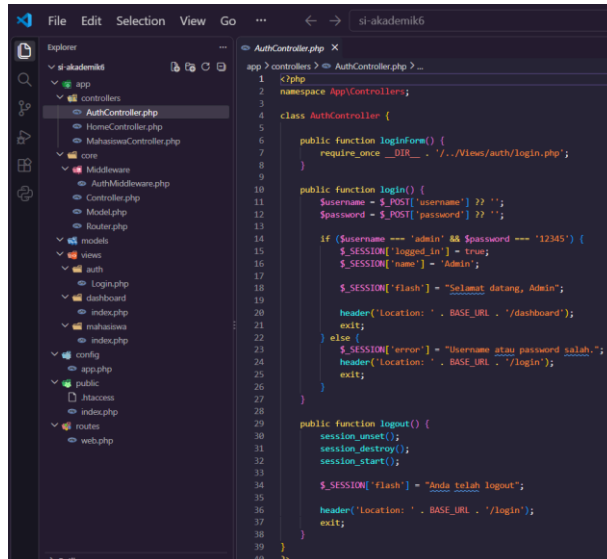

Mahasiswa menyusun struktur folder lengkap, membuat AuthController (login/logout), dan melindungi beberapa route dengan AuthMiddleware.

- **Langkah**

1. Susunan folder.

2. Buat AuthController dengan method loginForm, login, logout.

3. Buat form login sederhana.

```

1 <doctype html>
2 <html lang="id">
3
4 <meta charset="UTF-8">
5 <title>login - Sistem Informasi Akademik</title>
6 <link href="https://cdn.jsdelivr.net/npm/bootstrap@5.3.0/dist/css/bootstrap.min.css" rel="stylesheet">
7 </head>
8 <body class="bg-light">
9 <div class="container mt-5">
10 <div class="text-center">POLITEKNIK NEGERI Jember</div>
11 <div class="text-center mb-4">Sistem Informasi Akademik</div>
12
13 <div class="card mx-auto" style="max-width: 400px;">
14 <div class="card-body">
15 <div class="card-title text-center mb-4">Login</div>
16
17 <div class="text-center">
18 <div class="alert alert-info"><?php if (isset($_SESSION['flash'])): ?>
19 <div class="alert alert-info"><?php if (isset($_SESSION['flash'])): ?>
20 <div class="alert alert-info"><?php if (isset($_SESSION['flash'])): ?>
21 <div class="alert alert-info"><?php if (isset($_SESSION['flash'])): ?>
22 <div class="alert alert-info"><?php if (isset($_SESSION['flash'])): ?>
23 <div class="alert alert-info"><?php if (isset($_SESSION['flash'])): ?>
24 <div class="alert alert-info"><?php if (isset($_SESSION['flash'])): ?>
25 <div class="alert alert-info"><?php if (isset($_SESSION['flash'])): ?>
26 <div class="alert alert-info"><?php if (isset($_SESSION['flash'])): ?>
27 <div class="alert alert-info"><?php if (isset($_SESSION['flash'])): ?>
28 <div class="alert alert-info"><?php if (isset($_SESSION['flash'])): ?>
29 <div class="alert alert-info"><?php if (isset($_SESSION['flash'])): ?>
30 <div class="alert alert-info"><?php if (isset($_SESSION['flash'])): ?>
31 <div class="alert alert-info"><?php if (isset($_SESSION['flash'])): ?>
32 <div class="alert alert-info"><?php if (isset($_SESSION['flash'])): ?>
33 <div class="alert alert-info"><?php if (isset($_SESSION['flash'])): ?>
34 <div class="alert alert-info"><?php if (isset($_SESSION['flash'])): ?>
35 <div class="alert alert-info"><?php if (isset($_SESSION['flash'])): ?>
36 <div class="alert alert-info"><?php if (isset($_SESSION['flash'])): ?>
37 <div class="alert alert-info"><?php if (isset($_SESSION['flash'])): ?>
38 <div class="alert alert-info"><?php if (isset($_SESSION['flash'])): ?>
39 <div class="alert alert-info"><?php if (isset($_SESSION['flash'])): ?>
40 <div class="alert alert-info"><?php if (isset($_SESSION['flash'])): ?>

```

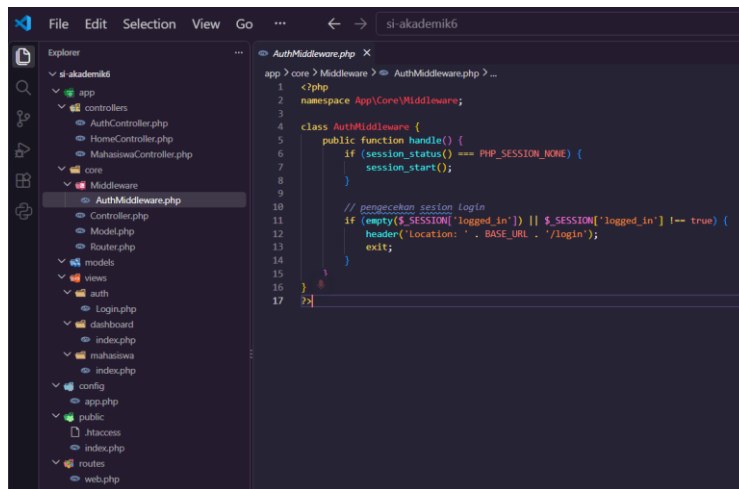

4. Simulasikan login sukses dengan hardcode username/password dulu (nanti diganti database).

```

1 <?php
2 namespace App\Controllers;
3
4 class AuthController {
5
6     public function loginForm() {
7         require_once __DIR__ . '/../Views/auth/login.php';
8     }
9
10    public function login() {
11        $username = $_POST['username'] ?? '';
12        $password = $_POST['password'] ?? '';
13
14        if ($username === 'admin' && $password === '12345') {
15            $_SESSION['logged_in'] = true;
16            $_SESSION['name'] = 'Admin';
17
18            $_SESSION['flash'] = "Selamat datang, Admin";
19
20            header('Location: ' . BASE_URL . '/dashboard');
21            exit;
22        } else {
23            $_SESSION['error'] = "Username atau password salah.";
24            header('Location: ' . BASE_URL . '/login');
25            exit;
26        }
27    }
28
29    public function logout() {
30        session_unset();
31        session_destroy();
32        session_start();
33
34        $_SESSION['flash'] = "Anda telah logout";
35
36        header('Location: ' . BASE_URL . '/login');
37        exit;
38    }
39 }
40

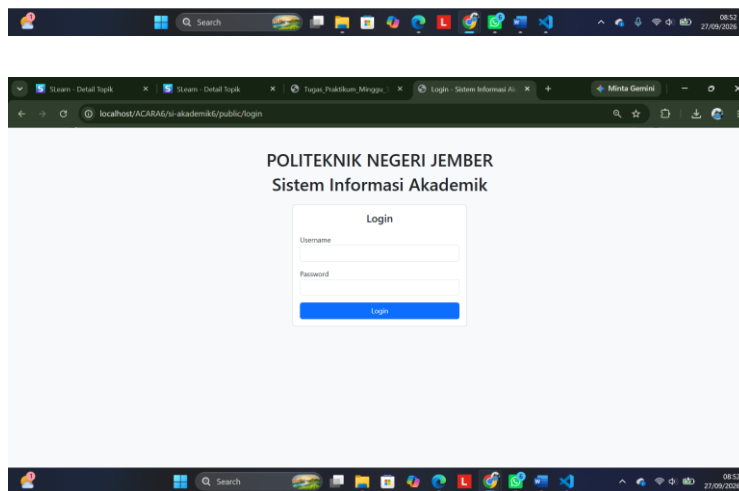

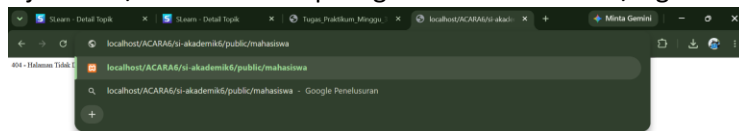

```

5. Pasang AuthMiddleware pada route /dashboard dan /mahasiswa.

```
1 <?php
2 namespace App\Core\Middleware;
3
4 class AuthMiddleware {
5     public function handle() {
6         if (session_status() === PHP_SESSION_NONE) {
7             session_start();
8         }
9
10        // pengecekan session login
11        if (empty($_SESSION['logged_in']) || $_SESSION['logged_in'] !== true) {
12            header("Location: " . BASE_URL . "/login");
13            exit;
14        }
15    }
16 }
17 }
```

6. Uji: akses /mahasiswa tanpa login harus redirect ke /login.

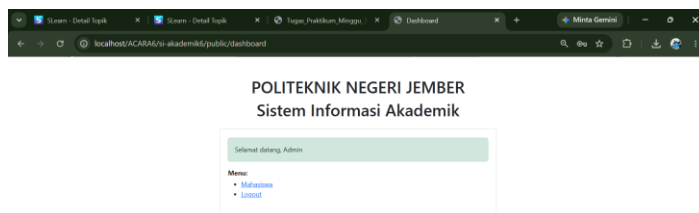

- **Tugas Mandiri**

1. flash message: setelah login sukses, tampilkan alert "Selamat datang, Admin" di dashboard.

```

AuthController.php X
app > controllers > AuthController.php > AuthController > logout
1 <?php
2 namespace App\Controllers;
3
4 class AuthController {
5
6     public function loginForm() {
7         require_once __DIR__ . '/../Views/auth/login.php';
8     }
9
10    public function login() {
11        $username = $_POST['username'] ?? '';
12        $password = $_POST['password'] ?? '';
13
14        if ($username === 'admin' && $password === '12345') {
15            $_SESSION['logged_in'] = true;
16            $_SESSION['name'] = 'Admin';
17
18            //tugas mandiri setelah login sukses, tampilkan alert "Selamat datang, Admin" di dashboard.
19            $_SESSION['flash'] = "Selamat datang, Admin";
20
21            header('Location: ' . BASE_URL . '/dashboard');
22            exit;
23        } else {
24            $_SESSION['error'] = "Username atau password salah.";
25            header('Location: ' . BASE_URL . '/login');
26            exit;
27        }
28    }
29

```

2. flash message: setelah logout, tampilkan "Anda telah logout".

```

app > controllers > AuthController.php > AuthController > logout
2 namespace App\Controllers;
3
4 class AuthController {
5
6     public function loginForm() {
7         require_once __DIR__ . '/../Views/auth/login.php';
8     }
9
10    public function login() {
11        $username = $_POST['username'] ?? '';
12        $password = $_POST['password'] ?? '';
13
14        if ($username === 'admin' && $password === '12345') {
15            $_SESSION['logged_in'] = true;
16            $_SESSION['name'] = 'Admin';
17
18            //tugas mandiri setelah login sukses, tampilkan alert "Selamat datang, Admin" di dashboard.
19            $_SESSION['flash'] = "Selamat datang, Admin";
20
21            header('Location: ' . BASE_URL . '/dashboard');
22            exit;
23        } else {
24            $_SESSION['error'] = "Username atau password salah.";
25            header('Location: ' . BASE_URL . '/login');
26            exit;
27        }
28    }
29
30    public function logout() {
31        session_unset();
32        session_destroy();
33        session_start();
34
35        //tugas mandiri Setelah logout, tampilkan "Anda telah logout".
36        $_SESSION['flash'] = "Anda telah logout";
37
38        header('Location: ' . BASE_URL . '/login');
39        exit;
40    }
41 }
42 >>

```
